(To create a table in sql):-

```
create table STUDENTS (
STUDENT ID NUMBER PRIMARY KEY,
STUDENT_NAME VARCHAR2 (10),
STUDENT_LOCATION VARCHAR2 (10),
GENDER VARCHAR2 (10),
COURSE VARCHAR2 (8));
```

(ALWAYS TYPE NEW COMMANDS for better understanding as beginner)

(To insert values in a table in sql):-

```
INSERT INTO STUDENTS VALUES (01,'preeti",'delhi',' female 1BCA");

SELECT * FROM STUDENTS;
INSERT INTO STUDENTS VALUES (02,"neha','delhi','female',"BCA");
SELECT * FROM STUDENTS;
INSERT INTO STUDENTS VALUES (03,'priya',"haryana','female','BCA");
SELECT * FROM STUDENTS;
INSERT INTO STUDENTS VALUES (04,'manas",'haryana",'male","BCA');
SELECT* FROM STUDENTS;
```

(To UPDATE values in a table in sql):-

```
SELECT * FROM STUDENTS;
UPDATE STUDENTS SET COURSE = 'BSC" WHERE STUDENT_ID = 4;
```

To DELETE values in a table in sql):-

```
SELECT * FROM STUDENTS;
DELETE FROM STUDENTS WHERE STUDENT_NAME priya"
```

(SELECT * FROM 'YOUR TABLE NAME' = shows the entire table you created!)
